

Instructions for Completing Part 1

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies that would be necessary to update or fully develop that information.

A. Project and Applicant/Sponsor Information.

Page 1 of 15

B. Government Approvals See Attachment**B. Government Approvals, Funding, or Sponsorship.** ("Funding" includes grants, loans, tax relief, and any other forms of financial assistance.)

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Council, Town Board, ☐ Yes ☐ No or Village Board of Trustees		
b. City, Town or Village ☐ Yes ☐ No Planning Board or Commission		
c. City, Town or ☐ Yes ☐ No Village Zoning Board of Appeals		
d. Other local agencies ☐ Yes ☐ No		
e. County agencies ☐ Yes ☐ No		
f. Regional agencies ☐ Yes ☐ No		
g. State agencies ☐ Yes ☐ No		
h. Federal agencies ☐ Yes ☐ No		
i. Coastal Resources. <i>i.</i> Is the project site within a Coastal Area or the waterfront area of a Designated Inland Waterway? ☐ Yes ☒ No <i>ii.</i> Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐ Yes ☒ No <i>iii.</i> Is the project site within a Coastal Erosion Hazard Area? ☐ Yes ☒ No		

C. Planning and Zoning**C.1. Planning and zoning actions.**

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule, or regulation be the only approval(s) that must be granted to enable the proposed action to proceed? ☐ Yes ☒ No

- If Yes, complete sections C, F and G.
- If No, proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally adopted (city, town, village, or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☒ Yes ☐ No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☐ Yes ☒ No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other)? ☐ Yes ☒ No

If Yes, identify the plan(s):

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan or an adopted municipal farmland protection plan? ☐ Yes ☒ No

If Yes, identify the plan(s):

d. Is the proposed action in a municipality with an adopted comprehensive or individual plan that addresses climate change? ☐ Yes ☒ No

If Yes, identify the elements of the plan that are relevant to the action:

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance? ☒ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?

Islip Mixed-Use Planned Development District (IMUPDD), Industrial 1 District (IND1), Residence AA District (AA), and Industrial Corridor District (ICD) zoning districts of the Town of Islip

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☒ No

c. Is a zoning change requested as part of the proposed action? ☒ Yes ☐ No
If Yes, what is the proposed new zoning for the site?

Industrial I (IND1) for portions of the site not currently designated as IND1

C.4. Existing community services.

a. In what school district is the project site located?
Sachem Central School District

b. What police or other public protection forces serve the project site?
Suffolk County Police Department - Fifth Precinct

c. Which fire protection and emergency medical services serve the project site?
Holbrook Fire Department provides fire protection and EMS to the Subject Property

d. What parks serve the project site?
Sans Souci County Park, Islip Grange Park, Greenbelt Recreation Center, Holbrook Country Club, Holbrook Park (PAL Complex), Michael Buckley Park, Pearl Street Park

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)?
Industrial/Warehouse

b. a. Total acreage of the site of the proposed action?	138.05±	acres
b. Total acreage to be physically disturbed?	101.60±	acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor?	137.23±*	acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☒ No
If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☒ No **

If Yes,

i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)

ii. Is a cluster/conservation layout proposed? ☐ Yes ☐ No

iii. Number of lots proposed? _____

iv. Minimum and maximum proposed lot sizes? Minimum _____ Maximum _____

*The Subject Property comprises 138.05± acres. Currently, the Applicant owns approximately 137.23± acres and intends to acquire SCTM Nos. 500-217-2-7.1 and 7.2, totaling 0.82± acre, from the Town of Islip, as part of the Proposed Action.

**The Town of Islip may require tax lot consolidation as a condition of Site Plan Approval.

e. Will the proposed action be constructed in multiple phases? ☐ Yes ☒ No

i. If No, anticipated period of construction: 22± months

ii. If Yes:

- Total number of phases anticipated _____
- Anticipated commencement date of phase 1 (including demolition) _____ month _____ year
- Anticipated completion date of final phase _____ month _____ year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases: _____

f. Does the project include new residential uses? ☐ Yes ☒ No

If Yes, show numbers of units proposed.

	<u>One Family</u>	<u>Two Family</u>	<u>Three Family</u>	<u>Multiple Family (four or more)</u>
Initial Phase	_____	_____	_____	_____
At completion of all phases	_____	_____	_____	_____

g. Does the proposed action include new non-residential construction (including expansions)? ☒ Yes ☐ No

If Yes,

i. Total number of structures ⁶ _____

ii. Dimensions (in feet) of largest proposed structure: ^{60±} height; ^{640±} width; and ^{1,960±} length

iii. Approximate extent of building space to be heated or cooled: 4.3± million square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? ☐ Yes ☒ No

If Yes,

i. Purpose of the impoundment: _____

ii. If a water impoundment, the principal source of the water: ☐ Ground water ☐ Surface water streams ☐ Other specify: _____

iii. If other than water, identify the type of impounded/contained liquids and their source. _____

iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: _____ acres

v. Dimensions of the proposed dam or impounding structure: _____ height; _____ length

vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete): _____

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? ☐ Yes ☒ No*

(Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite)

*Final grading plan has not yet been developed, but goal is a balanced site. If material removal is necessary, same would be handled/disposed of in accordance with prevailing regulations.

If Yes:

i. What is the purpose of the excavation or dredging? _____

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?

- Volume (specify tons or cubic yards): _____
- Over what duration of time? _____

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them. _____

iv. Will there be onsite dewatering or processing of excavated materials? ☐ Yes ☐ No

If yes, describe. _____

v. What is the total area to be dredged or excavated? _____ acres

vi. What is the maximum area to be worked at any one time? _____ acres

vii. What would be the maximum depth of excavation or dredging? _____ feet

viii. Will the excavation require blasting? ☐ Yes ☐ No

ix. Summarize site reclamation goals and plan: _____

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐ Yes ☒ No

If Yes:

i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):

ii. Describe how the proposed action would affect that waterbody or wetland, e.g., excavation, fill, placement of structures, or alteration of channels, banks, and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐ Yes ☐ No

If Yes, describe: _____

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐ Yes ☐ No

If Yes:

- acres of aquatic vegetation proposed to be removed: _____
- expected acreage of aquatic vegetation remaining after project completion: _____
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access): _____
- proposed method of plant removal: _____
- if chemical/herbicide treatment will be used, specify product(s): _____

v. Describe any proposed reclamation/mitigation following disturbance: _____

c. Will the proposed action use, or create a new demand for water? ☒ Yes ☐ No

If Yes:

i. Total anticipated water usage/demand per day: _____ 72,000±* gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☒ Yes ☐ No

If Yes:

- Name of district or service area: Suffolk County Water Authority - Distribution Area #1
- Does the existing public water supply have capacity to serve the proposal? ** ☒ Yes ☐ No
- Is the project site in the existing district? ☒ Yes ☐ No
- Is expansion of the district needed? ☐ Yes ☒ No
- Do existing lines serve the project site? ☐ Yes ☒ No **

iii. Will line extension within an existing district be necessary to supply the project? ☐ Yes ☒ No **

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: _____
- Source(s) of supply for the district: _____

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐ Yes ☒ No

If, Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- Proposed source(s) of supply for new district: _____

v. If a public water supply will not be used, describe plans to provide water supply for the project: _____
N/A

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: *** gallons/minute.

*Water demand figures were provided by the Applicant based on similar projects.

**The site is currently undeveloped, thus there are no existing water supply lines on the site. Consultations with the Suffolk County Water Authority will be conducted to confirm water availability and potential line extension prior to construction.

***Water will be supplied from existing water supply wells of the Suffolk County Water Authority. The specific well to serve project site is not yet identified.

d. Will the proposed action generate liquid wastes?

☒ Yes ☐ No

If Yes:

i. Total anticipated liquid waste generation per day: 61,200± gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each): _____

Sanitary wastewater

iii. Will the proposed action use any existing public wastewater treatment facilities?

☒ Yes ☐ No

If Yes:

• Name of wastewater treatment plant to be used: Parkland Sewage Treatment Plant

• Name of district: Suffolk County Sewer District No. 14 (Parkland)

• Does the existing wastewater treatment plant have capacity to serve the project?

** ☒ Yes ☐ No

• Is the project site in the existing district?

☒ Yes ☐ No

• Is expansion of the district needed?

☐ Yes ☒ No

• Do existing sewer lines serve the project site?

☐ Yes ☒ No **

• Will a line extension within an existing district be necessary to serve the project?

☐ Yes ☒ No **

If Yes:

• Describe extensions or capacity expansions proposed to serve this project: _____

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site?

☐ Yes ☒ No

If Yes:

• Applicant/sponsor for new district: _____

• Date application submitted or anticipated: _____

• What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

N/A

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

N/A

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e., sheet flow) during construction or post construction?

☒ Yes ☐ No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or 83.80± acres (impervious surface)

_____ Square feet or 138.05± acres (parcel size)

ii. Describe types of new point sources.

Roof drains, curbs

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water, or off-site surface waters)?

Stormwater runoff will directed towards the proposed Drainage Reserve Areas and subsurface infiltration.

• If to surface waters, identify receiving water bodies or wetlands: _____

N/A

• Will stormwater runoff flow to adjacent properties?

☐ Yes ☒ No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☒ Yes ☐ No ***

*Sewage generation figures were provided by the Applicant based on similar projects.

**The site is currently undeveloped, thus there are no existing sewer lines on the site. Consultations with the Suffolk County Department of Public Works will be conducted to confirm sewer availability and potential line extension prior to construction.

***The proposed project will collect and re-use a portion of stormwater for on-site irrigation.

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☒ Yes ☐ No If Yes, identify: i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles) Tractor trailers ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers) Generators / Construction equipment iii. Stationary sources during operations (e.g., process emissions, boilers, electric generation, surface coating) Generator / HVAC systems	
g. Will any air emission sources named in D.2.f (above), require an Air Facility Registration, Air State Facility Permit, Title IV Permit or Title V Permit? ☐ Yes ☐ No *See note below. If Yes: i. Is the proposed action subject to the Nonattainment New Source Review or Prevention of Significant Deterioration requirements discussed in 6 NYCRR Part 231? ☐ Yes ☐ No ii. As calculated in the air permit application, the proposed action has the potential to emit: • _____ Tons/year (short tons) of carbon monoxide (CO) • _____ Tons/year (short tons) of oxides of nitrogen (NO_x) • _____ Tons/year (short tons) of particulate matter (PM-10, PM-2.5) • _____ Tons/year (short tons) of volatile organic compounds (VOC) • _____ Tons/year (short tons) of sulfur dioxide (SO₂) iii. Will emissions of air contaminants from the proposed action described above exceed the corresponding major source thresholds? ☐ Yes ☐ No iv. Does the proposed action have the potential to emit 10 tons/year or more of any one designated hazardous air pollutant or 25 tons/year or more of any combination of such hazardous air pollutants (6NYCRR 200.1(ag))? ☐ Yes ☐ No If Yes, provide the total potential to emit hazardous air pollutants in short tons/year: _____	
h. Will the proposed action generate or emit annual direct and indirect greenhouse gas emissions, such as carbon dioxide, methane, nitrous oxide, sulfur hexafluoride, hydrofluorocarbons, or perfluorocarbons in excess of 10,000 metric tons of total carbon dioxide equivalents per year at any point in the lifetime of the proposed action (estimated using the carbon dioxide equivalent definition and global warming potentials provided in 6 NYCRR Part 496)? ☐ Yes ☐ No *See note below. If Yes: i. Estimate the proposed action's metric tons of carbon dioxide equivalents in tons/year (metric): _____ ii. Describe any greenhouse gas capture, control, or elimination measures included in project design: _____ Rooftop solar, electric fleet vehicles and building climate control systems, and other measures to reduce GHG emissions will be incorporated into the proposed project and described more fully as the project design progresses.	
i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐ Yes ☒ No If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust): _____	
j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? ☒ Yes ☐ No A Traffic Impact Study is being submitted under separate cover. If Yes: i. When is the peak traffic expected (Check all that apply): ☒ Morning ☒ Evening ☒ Weekend ☐ Randomly between hours of _____ to _____. ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): Average weekday: 555 truck trips; Seasonal peak weekday: 809 truck trips iii. Parking spaces: Existing 0 Proposed 2,046 Net increase/decrease +2,046 iv. Does the proposed action include any shared use parking? ☐ Yes ☒ No v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe: See Description of the Proposed Action within EAF Attachment for description of proposed site access and road modifications. vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☒ Yes ☐ No vii. Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☒ Yes ☐ No viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☐ Yes ☒ No	

*An air quality and direct and indirect greenhouse gas (GHG) emissions assessment is being prepared, including identification of potential required permits/registrations and appropriate GHG reduction measures consistent with applicable regulations.

k. Will the proposed action (for commercial or industrial projects only) generate new or additional energy demand? ☒ Yes ☐ No If Yes: i. Estimate annual electricity demand during operation of the proposed action: _____ <u>Electrical load is estimated 12.1± MW peak demand.</u> ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other): <u>PSEG Long Island, on-site renewable (solar)</u>			
iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐ Yes ☒ No			
l. Hours of operation. Answer all items which apply. <table style="width: 100%;"> <tr> <td style="width: 50%; vertical-align: top;"> i. During Construction: • Monday - Friday: <u>7:00 a.m. - 8:00 p.m.*</u> • Saturday: <u>7:00 a.m. - 8:00 p.m.*</u> • Sunday: <u>N/A</u> • Holidays: <u>N/A</u> </td> <td style="width: 50%; vertical-align: top;"> ii. During Operations: • Monday - Friday: <u>24/7</u> • Saturday: <u>24/7</u> • Sunday: <u>24/7</u> • Holidays: <u>24/7</u> </td> </tr> </table>		i. During Construction: • Monday - Friday: <u>7:00 a.m. - 8:00 p.m.*</u> • Saturday: <u>7:00 a.m. - 8:00 p.m.*</u> • Sunday: <u>N/A</u> • Holidays: <u>N/A</u>	ii. During Operations: • Monday - Friday: <u>24/7</u> • Saturday: <u>24/7</u> • Sunday: <u>24/7</u> • Holidays: <u>24/7</u>
i. During Construction: • Monday - Friday: <u>7:00 a.m. - 8:00 p.m.*</u> • Saturday: <u>7:00 a.m. - 8:00 p.m.*</u> • Sunday: <u>N/A</u> • Holidays: <u>N/A</u>	ii. During Operations: • Monday - Friday: <u>24/7</u> • Saturday: <u>24/7</u> • Sunday: <u>24/7</u> • Holidays: <u>24/7</u>		
m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☒ Yes ☐ No If yes: i. Provide details including sources, time of day and duration: Ambient noise levels may be temporarily increased during construction activities, which would be performed between the hours of 7:00 a.m. and 8:00 p.m. on weekdays and Saturdays, in accordance with the Town of Islip noise regulations (Town Code Chapter 35). An operational noise analysis is being prepared. ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☒ Yes ☐ No Describe: <u>The Subject Property is mostly vacant, with trees covering the majority of the site. Tree removal is proposed, but a sound wall is proposed along the northern portion of the site, with substantial vegetated buffers remaining adjacent to off-site uses. See Brief Description of Proposed Action in Attachment.</u>			
n. Will the proposed action have outdoor lighting? ☒ Yes ☐ No If yes: i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures: It is anticipated that outdoor lighting fixtures will be installed for safety and security purposes, and will be down-shielded to prevent light spill. A lighting plan will be prepared. ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☒ No Describe: <u>The majority of the Subject Property is vacant, with trees covering most of the site. Tree removal is proposed; however, vegetated buffers will remain to act as a light barrier/screen to adjacent properties.</u>			
o. Does the proposed action have the potential to produce odors for more than one hour per day? ☐ Yes ☒ No If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures: _____			
p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☒ No If Yes: i. Product(s) to be stored _____ ii. Volume(s) _____ per unit time _____ (e.g., month, year) iii. Generally, describe the proposed storage facilities: _____			
q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticide) during construction or operation? ☒ Yes ☐ No If Yes: i. Describe proposed treatment(s): <u>Routine landscape maintenance only</u> ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☒ No			

* Represents permitted construction hours per Town of Islip noise regulations, Chapter 35 of the Town Code.

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☒ Yes ☐ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: 1,400± tons per year (unit of time)
- Operation : 4,000± tons per year (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction: A construction waste plan will be employed to track and manage solid waste generated during construction. Recyclable construction and demolition debris will be carted off-site by a licensed carter to a licensed facility.
- Operation: An operational waste plan will be employed to track and manage solid waste generated during project operations. See Attachment for description of operational solid waste recycling/solid waste diversion methods.

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction: Solid waste generated during construction will be carted off-site by a licensed carter for disposal at a licensed facility.
- Operation: Solid waste generated during project operations will be carted off-site by a licensed carter for disposal at a licensed facility.

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☒ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☐ Yes ☒ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled, or managed at facility: _____

ii. Generally describe processes or activities involving hazardous wastes or constituents: _____

iii. Specify amount to be handled or generated _____ tons/month

iv. Describe any proposals for on-site minimization, recycling, or reuse of hazardous constituents: _____

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☐ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility: _____

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban
 ☒ Industrial
 ☒ Commercial
 ☒ Residential (suburban)
 ☐ Rural (non-farm)
 ☐ Forest
 ☐ Agriculture
 ☐ Aquatic
 ☒ Other (specify): Recreation/Open Space: Sans Souci County Park, Transportation, Utilities

ii. If mix of uses, generally describe:

The Subject Property is a predominantly wooded and vacant parcel located in a mixed-use setting, centrally positioned between a Costco Wholesale and adjacent commercial uses to the east, surrounding residential neighborhoods to the north, northeast and northwest, Sunrise Highway, Sans Souci County Park and multi-family residences to the south, and industrial and distribution facilities to the west.

b. Land uses and cover types on the project site.

Land use or Cover type	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
- Roads, buildings, and other paved or impervious surfaces (total) - Industrial or manufacturing - Commercial - Residential	0.50±	83.80±	+83.30±
Forested	136.77±	36.90±	-99.87±
Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	0.03±	0	-0.03±
Agricultural (includes active orchards, field, greenhouse, etc.)	0	0	0
Surface water features (lakes, ponds, streams, rivers, etc.)	0	0	0
Wetlands (freshwater or tidal)	0.63± (Recharge Basin)	0.63± (Recharge Basin)	0
Non-vegetated (bare rock, earth, or fill)	0.12±	0.12±	0
Other, Describe: <u>Landscaping</u>	0	16.60±	+16.60±

v. Is the project site subject to an institutional control limiting property uses? ☐ Yes ☒ No									
• If Yes, DEC site ID number: _____ • Describe the type of institutional control (e.g., deed restriction or easement): _____ • Describe any use limitations: _____ • Describe any engineering controls: _____ • Will the project affect the institutional or engineering controls in place? ☐ Yes ☐ No • Explain: _____									
E.2. Natural Resources On or Near Project Site									
a. What is the average depth to bedrock on the project site? _____ <u>1,600±</u> feet below grade surface (bgs)									
b. Are there bedrock outcroppings on the project site? ☐ Yes ☒ No If Yes, what proportion of the site is comprised of bedrock outcroppings? _____ %									
c. Predominant soil type(s) present on project site: <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">Riverhead sandy loam, 0 to 3% slopes (RdA)</td> <td style="width: 50%; text-align: right;"><u>63.9±</u> %</td> </tr> <tr> <td>Carver and Plymouth soils, 3-15% slopes (CpC) 4.0±%</td> <td style="text-align: right;">Plymouth loamy coarse sand, 0 to 3% slopes (PIA) <u>25.3±</u> %</td> </tr> <tr> <td>Plymouth loamy coarse sand 8-15% slopes (PIC) 2.4%</td> <td style="text-align: right;">Carver and Plymouth soils, 0 to 3 percent slopes (CpA) <u>4.3±</u> %</td> </tr> <tr> <td>Atsion sand (At) 0.1%</td> <td></td> </tr> </table>		Riverhead sandy loam, 0 to 3% slopes (RdA)	<u>63.9±</u> %	Carver and Plymouth soils, 3-15% slopes (CpC) 4.0±%	Plymouth loamy coarse sand, 0 to 3% slopes (PIA) <u>25.3±</u> %	Plymouth loamy coarse sand 8-15% slopes (PIC) 2.4%	Carver and Plymouth soils, 0 to 3 percent slopes (CpA) <u>4.3±</u> %	Atsion sand (At) 0.1%	
Riverhead sandy loam, 0 to 3% slopes (RdA)	<u>63.9±</u> %								
Carver and Plymouth soils, 3-15% slopes (CpC) 4.0±%	Plymouth loamy coarse sand, 0 to 3% slopes (PIA) <u>25.3±</u> %								
Plymouth loamy coarse sand 8-15% slopes (PIC) 2.4%	Carver and Plymouth soils, 0 to 3 percent slopes (CpA) <u>4.3±</u> %								
Atsion sand (At) 0.1%									
d. What is the average depth to the water table on the project site? Average: _____ <u>19±</u> feet bgs									
e. Drainage status of project site soils: <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">☒ Well Drained:</td> <td style="width: 50%; text-align: right;"><u>99.9±</u> % of site</td> </tr> <tr> <td>☐ Moderately Well Drained:</td> <td style="text-align: right;">_____ % of site</td> </tr> <tr> <td>☒ Poorly Drained</td> <td style="text-align: right;"><u>0.1</u> % of site</td> </tr> </table>		☒ Well Drained:	<u>99.9±</u> % of site	☐ Moderately Well Drained:	_____ % of site	☒ Poorly Drained	<u>0.1</u> % of site		
☒ Well Drained:	<u>99.9±</u> % of site								
☐ Moderately Well Drained:	_____ % of site								
☒ Poorly Drained	<u>0.1</u> % of site								
f. Approximate proportion of proposed action site with slopes: <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">☒ 0-10%:</td> <td style="width: 50%; text-align: right;"><u>95±</u> % of site</td> </tr> <tr> <td>☒ 10-15%:</td> <td style="text-align: right;"><u>2.5±</u> % of site</td> </tr> <tr> <td>☒ 15% or greater:</td> <td style="text-align: right;"><u>2.5±</u> % of site</td> </tr> </table>		☒ 0-10%:	<u>95±</u> % of site	☒ 10-15%:	<u>2.5±</u> % of site	☒ 15% or greater:	<u>2.5±</u> % of site		
☒ 0-10%:	<u>95±</u> % of site								
☒ 10-15%:	<u>2.5±</u> % of site								
☒ 15% or greater:	<u>2.5±</u> % of site								
g. Are there any unique geologic features on the project site? ☐ Yes ☒ No If Yes, describe: _____									
h. Surface water features.									
i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds, or lakes)? ☐ Yes ☒ No									
ii. Do any wetlands or other waterbodies adjoin the project site? ☐ Yes ☒ No									
If Yes to either <i>i</i> or <i>ii</i> , continue. If No, skip to E.2.i.									
iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☐ Yes ☐ No									
iv. For each identified regulated wetland and waterbody on the project site, provide the following information:									
• Streams: Name _____ Classification _____ • Lakes or Ponds: Name _____ Classification _____ • Wetlands: Name _____ Approximate Size _____ • Wetland No. (if regulated by DEC) _____									
v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐ Yes ☐ No									
If Yes, name of impaired water body/bodies and basis for listing as impaired: _____									
i. Is the project site in a designated Floodway? ☐ Yes ☒ No									
j. Is the project site in the 100-year Floodplain? ☐ Yes ☒ No									
k. Is the project site in the 500-year Floodplain? ☐ Yes ☒ No									
l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☒ Yes ☐ No									
If Yes:									
i. Name of aquifer: _____ Nassau-Suffolk Sole Source Aquifer									

m. Identify the predominant wildlife species that occupy or use the project site: _____ <u>Black-capped Chickadee, White-Breasted Nuthatch, Pine Warbler, Eastern Wood Peewee, Blue Jay, Downy Woodpecker, Whitetail Deer, Eastern Chipmunk, and Eastern Gray Squirrel</u>	
n. Does the project site contain a designated significant natural community? ☐ Yes ☒ No If Yes: i. Describe the habitat/community (composition, function, and basis for designation): _____ ii. Source(s) of description or evaluation: _____ iii. Extent of community/habitat: • Currently: _____ acres • Following completion of project as proposed: _____ acres • Gain or loss (indicate + or -): _____ acres	
o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐ Yes ☒ No If Yes: i. Species and listing (endangered or threatened): _____	
p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐ Yes ☒ No If Yes: i. Species and listing: _____	
q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐ Yes ☒ No If Yes, give a brief description of how the proposed action may affect that use: _____	
E.3. Designated Public Resources On or Near Project Site	
a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐ Yes ☒ No If Yes, provide county plus district name/number: _____	
b. Are agricultural lands consisting of highly productive soils present? ☐ Yes ☒ No i. If Yes: acreage(s) on project site: _____ ii. Source(s) of soil rating(s): _____	
c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐ Yes ☒ No If Yes: i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature ii. Provide brief description of landmark, including values behind designation and approximate size/extent: _____	
d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐ Yes ☒ No If Yes: i. CEA name: _____ ii. Basis for designation: _____ iii. Designating agency and date: _____	

E.5 Future Physical Climate Risks

Will the proposed action be vulnerable to the following future physical climate risks under current or projected future conditions:

- a. Is the proposed action vulnerable to damage from a projected 100-year flood? ☐ Yes ☒ No
b. Is the proposed action vulnerable to damage from a projected 500-year flood? ☐ Yes ☒ No
c. Is the proposed action in an area potentially affected by sea level rise? ☐ Yes ☒ No

d. Will the proposed action increase the vulnerability of human or ecological communities to the following:

- i. drought? ☐ Yes ☒ No
ii. temperature extremes (hot or cold)? ☐ Yes ☒ No
iii. extreme storms, including high winds? ☐ Yes ☒ No
iv. landslides? ☐ Yes ☒ No
v. coastal erosion? ☐ Yes ☒ No
vi. stormwater flooding? ☐ Yes ☒ No
vii. other climate or weather hazards? ☐ Yes ☒ No If Yes, describe: _____

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

ISP NY Hold Co. LLC

as environmental consultant to the Applicant

Project Sunrise
Northeast Corner of Sunrise Highway and Veterans Memorial Highway
Hamlet of Holbrook, Town of Islip, Suffolk County

Part 1 – Full Environmental Assessment Form

Attachment

Page 1, Item A – Brief Description of the Proposed Action:

The Proposed Action consists of an application to the Town of Islip Town Board seeking a change of zone from Islip Mixed-Use Planned Development District (IMUPDD), Industrial Corridor District (ICD) and Residence AA District (Residence AA) to Industrial 1 District (IND1), in which a small portion the site is currently zoned, among other discretionary actions, to facilitate the redevelopment of a 138.05±-acre site located north of Sunrise Highway (New York State Route 27) and east of Veterans Memorial Highway (New York State Route 454) in the hamlet of Holbrook, Town of Islip, Suffolk County (the "Subject Property"). This change of zone is being requested to facilitate the development of two warehouses comprising 725,000± square feet (sf) and 3,484,260± sf and associated appurtenances, including office space blocks and a one-level parking garage.

The Subject Property comprises the following Suffolk County Tax Map lots:

- › District 500 – Section 217 – Block 2 – Lots 3.2, 7.1,* 7.2,* and 9.5
- › District 500 – Section 218 – Block 1 – Lots 1.11, 2.5, 2.6, 3.3, 3.4, 4.19, 5 and 6
- › District 500 – Section 239 - Block 1 – Lots 3.2, 6.1, 7, 15.1, 17.2, 17.5, 17.6, 17.7, and 18.1.

* Lots 7.1 and 7.2, comprising 0.82± acre, are proposed to be acquired from the Town of Islip.

The Subject Property is predominantly vacant and wooded. Several Long Island Power Authority (LIPA)–owned rights-of-way (ROWs), containing electric transmission towers, traverse the eastern and western portions of the site, with an additional LIPA transmission corridor located along the northern boundary of the Subject Property. Aside from the LIPA ROWs, existing development on the site is limited to two small vacant structures located in the southeastern corner of the property. These include a one-story, 4,200±-sf vacant commercial building and a one-story storage garage.

The Subject Property is predominantly situated within the IMUPDD zoning district. Portions of the Subject Property, specifically at the southeastern corner of the site, are within the IND1 District. The northern and western LIPA-owned ROWs and a small portion of the western LIPA-ROW is within the ICD. The eastern LIPA ROW is within the Residence AA District as is the 0.82±-acre Town-owned parcel known as the "Town triangle," which is to be purchased and become part of the Subject Property. As part of the Proposed Action, the Subject Property will be rezoned to be entirely within the IND1 District.

The Proposed Action will result in the construction of two warehouses, including a two-story (48-to-52-foot tall), 425,000±-sf building to the north (with future internal mezzanine expansion area of 300,000± sf, for a total of 725,000± sf of gross floor area), with a 9,800-sf office block, and a three-story (60-foot tall), 3,484,260±-sf building to the south, with a 45,000±-sf office block. Several guardhouses and drop-off shelters are also proposed throughout the site, as is a 165,984±-sf one-level parking garage, such that the development will total 4,430,709± sf of floor area. A total of 2,046 parking, same-day delivery and trailer spaces, including 30 accessible spaces, are proposed on the site, as follows:

- A one-level parking garage containing 699 parking spaces (451 spaces on the surface level beneath the deck and 248 spaces on the deck). This garage will serve associates (employees)
- An 801-space surface parking lot for associates
- 120 same-day delivery spaces
- 426 trailer spaces.

Project Sunrise
Northeast Corner of Sunrise Highway and Veterans Memorial Highway
Part 1 – Full Environmental Assessment Form Attachment

The site will also contain 115 warehouse loading bays. The 426 trailer parking spaces and 115 loading bays will face Sunrise Highway to the south and Veterans Memorial Highway to the west with vegetated buffers between the roadways and parking/loading areas.

Access to the Subject Property will be provided by three new signalized access roadways. One will be located on the west side of the Subject Property, providing a connection to the adjacent Applicant-owned property to the west and linking the Applicant's operations in the area. Another signalized intersection within the southwest corner of the Subject Property will provide direct access to Veterans Memorial Highway. Additionally, Beacon Drive is proposed to be realigned across the southeastern portion of the site to create a new, right-in/right-out signalized connection to the Sunrise Highway North Service Road. The realignment of Beacon Drive will involve a dedication of $3.45\pm$ acres of land to the Town of Islip. Additional access will be provided along Beacon Drive on the east side of the site, with two access drives – one that will align with Colin Drive and provide access through an internal roadway that will traverse the northern portion of the site and contain designated bus drop-off and pick-up locations, and the other located farther south along Beacon Drive. Additionally, there will be an exit-only access from the site to Beacon Drive. The access to/from Beacon Drive will require access easements across the LIPA right-of-way that traverses the eastern portion of the Subject Property.

Stormwater management will be designed to accommodate an eight-inch rainfall event through a system of catch basins and drywells distributed throughout the site. Stormwater will be conveyed to on-site drainage reserve areas to promote infiltration and effective runoff control. Utility services will be provided by PSEG Long Island for electricity and potentially National Grid for natural gas, with water supplied by the Suffolk County Water Authority, and sanitary wastewater conveyed to Suffolk County Sewer District No. 14 (Parkland). Consultations are being conducted with Suffolk County Water Authority and Suffolk County Department of Public Works to determine if utility upgrades are needed.

A vegetated buffer, with a minimum depth of $240\pm$ feet, will be maintained along the northern property boundary to provide separation between the proposed development, the LIPA ROW and the adjacent residential uses. In addition to the vegetated buffer, the Applicant is proposing the installation of a sound wall along the northern boundary of the developed area of the site to further minimize potential noise impacts. The proposed two-story warehouse will be setback $544\pm$ feet south of the northern property line, and the proposed parking garage will be $412\pm$ feet south of the northern property line.

The Proposed Action will incorporate a comprehensive suite of sustainability measures intended to reduce environmental impacts and improve long-term operational efficiency, including high Solar Reflectance Index (SRI) concrete pavement in parking areas and truck courts, a white or high-reflectance roof to reduce heat island effects, rooftop solar photovoltaic installations, low-flow plumbing fixtures, smart building controls through a building management system (BMS), hybrid rooftop units (RTUs) and electric heat pumps, electric or low-emission fleet vehicles with on-site electric vehicle charging stations, and permeable pavement for pedestrian areas. The project will also implement on-site waste minimization and recycling practices during operation, including sustainable packaging, an operational waste management plan, and internal waste tracking. The Applicant will commit to pursuing third-party green building certification, such as LEED or an equivalent program, which will require compliance with additional sustainability standards for building design, construction, and operation.

Project Sunrise
Northeast Corner of Sunrise Highway and Veterans Memorial Highway
Part 1 – Full Environmental Assessment Form Attachment

Page 2, Item B. – Government Approvals

Agency	Approval
Town of Islip Town Board	Change of Zone of Portions of Subject Property from IMUPDD, ICD and Residence AA to IND1; Recission of Covenants and Restrictions on Subject Property; Disposition of Town-owned "Triangle" property; Acceptance of Dedication of Land for Roadway Improvements; Abandonment of Paper Streets*
Town of Islip Planning Board and Department of Engineering	Site Plan Approval
Town of Islip Division of Traffic Safety	Highway Work Permit
Town of Islip Industrial Development Agency	Potential Financial Assistance
Suffolk County Department of Health Services	Sanitary disposal, water supply
Suffolk County Sewer Agency / Suffolk County Department of Public Works	Sewer Capacity/Connection, 239-f review
Suffolk County Planning Commission	239-m Referral
New York State Department of Transportation	Highway Work Permit
New York State Department of Environmental Conservation	SPDES General Permit for Stormwater Discharges from Construction Activity (GP 0-25-001) and Notice of Intent
Suffolk County Water Authority	Water Connection
PSEG Long Island (Long Island Power Authority)	Access Easement to Cross LIPA-Owned Utility Right-of-way; Electric Connection
National Grid	Natural Gas Connection (potential)
Federal Aviation Administration	Determination of No Hazard to Air Navigation

Note: *Abandonment of paper streets will also require review/approval of the Town of Islip Tax Assessor, Highway Department, Planning Department and Town Attorney.

Project Sunrise
Northeast Corner of Sunrise Highway and Veterans Memorial Highway
Part 1 – Full Environmental Assessment Form Attachment

Page 9, Item D.2.r.ii. – Describe any proposals for on-site minimization, recycling, or reuse of materials to avoid disposal as solid waste:

The table below identifies the specific operational waste material streams that would be generated at the facility and the corresponding diversion method assigned to each. These classifications reflect current operational practices and vendor capabilities. Diversion pathways are subject to periodic review and update as regional infrastructure and commodity markets evolve:

Material Type	Diversion Method
Cardboard / Corrugate	Recycling – baled and sold as commodity
Wood (pallets, dunnage)	Recycling
Paper	Single-stream recycling
Scrap Metal	Recycling
Plastic Film / Foil	Recycling (where available)
Organic Waste (food)	Composting / organic recycling
Stow Bags	Dedicated recycling program
PPE	Recycling (where available)

Page 11, Item E.1.h.iv. – If Yes to (i), (ii) or (iii) above, describe current status of site(s):

No spills have been reported at the Subject Property. As described below, remedial actions have been conducted adjacent to, and within 2,000 feet of the Subject Property.

NYSDEC ID 152022: The adjacent property to the west, situated at 717 Broadway Avenue, Holbrook, is identified on the NYSDEC Environmental Remediation Database as Goldisc Recording (Site Code 152022). Goldisc Recording ceased operations in 1983, and contamination was found consisting of solvents, polyvinyl chloride, and plating wastes. According to the NYSDEC Environmental Remediation Database, remediation was completed in 1997. This consisted of groundwater sampling and soil removal. Quarterly groundwater monitoring continues. The NYSDEC Environmental Remediation Database states that remediation at the site is complete. The site has been redeveloped as an Amazon warehouse facility.

NYSDEC ID 152007: NYSDEC Environmental Remediation Site Code 152007 – Stimpson Mfg. Co., is located at 900 Sylvan Avenue, approximately 1,170 feet south of the Subject Property. According to the NYSDEC Environmental Remediation Database, operations of Stimpson Mfg. Co. ceased in 2003, and contamination was found consisting of plating sludges. The site is now operated by a plumbing supply manufacturer. Remediation activities were conducted, including removal of contaminated soils, remediation of sanitary system leaching pools, and sealing and abandonment of wastewater system pipes. According to the NYSDEC Environmental Remediation Database, NYSDEC recommended no further action for soil cleanup, and ongoing groundwater monitoring has shown that groundwater quality has not deteriorated due to past contamination at the site.
