

PROTECT SUFFOLK COUNTY

Petition Opposing the Proposed Amazon Mega Warehouse - Project Sunrise

We, the undersigned residents of Suffolk County and Long Island, strongly oppose the proposed Amazon distribution and fulfillment facility known as **Project Sunrise** in Holbrook.

A development of this extraordinary size and intensity should not be viewed as an issue affecting only one neighborhood or one community. The potential impacts of a massive, twenty-four-hour logistics operation can extend far beyond the boundaries of the project site through our roadways, infrastructure, drinking-water supply, environment and surrounding communities.

The anticipated increase in truck and employee traffic, twenty-four-hour operations, industrial lighting, environmental impacts and loss of open space raise serious concerns for the health, safety, environment and quality of life of residents throughout Suffolk County.

This is not simply a Holbrook issue. This is a Suffolk County issue.

OUR PRIMARY CONCERNS

1. TRAFFIC, CONGESTION & PUBLIC SAFETY

A project of this magnitude would generate substantial truck and employee traffic that would not remain within Holbrook.

Vehicles traveling to and from the facility would utilize major regional roadways and connecting local roads throughout Suffolk County. Increased commercial traffic has the potential to worsen congestion, affect roadway safety and create additional challenges for commuters, school buses, pedestrians, cyclists and emergency responders.

The cumulative regional traffic impact must be fully considered before a project of this scale is allowed to move forward.

2. TWENTY-FOUR-HOUR INDUSTRIAL OPERATIONS

Round-the-clock trucking, loading operations, mechanical equipment, backup alarms, employee activity and vehicle movements represent a significant expansion of intensive industrial activity.

The impacts of a twenty-four-hour logistics operation should be evaluated not simply at the property line but in terms of how that activity affects surrounding communities and Suffolk County's transportation network.

3. LIGHT & NOISE POLLUTION

Industrial lighting, truck headlights, loading docks, parking areas, security lighting and continuous vehicle activity have the potential to create significant nighttime light and noise pollution.

Residents should not be expected to absorb the negative effects of an extraordinarily large industrial operation without a comprehensive examination of its short-term and long-term impacts.

4. PROTECT SUFFOLK COUNTY'S DRINKING WATER

Protecting our drinking water must be one of the highest priorities in evaluating any major development proposal.

Long Island depends on its underground aquifer system for drinking water. The replacement of a substantial wooded area with buildings, pavement, parking areas and truck facilities raises concerns regarding groundwater recharge, stormwater runoff and potential contamination.

Our drinking water does not recognize municipal or neighborhood boundaries.

Protecting the aquifer means protecting all of Long Island.

5. LOSS OF WOODLANDS, OPEN SPACE & WILDLIFE HABITAT

Large-scale clearing of wooded property can permanently eliminate habitat, displace wildlife, reduce natural groundwater recharge and diminish the environmental benefits provided by undeveloped land.

Once these natural resources are destroyed, they cannot simply be replaced.

Suffolk County has spent generations working to protect open space and drinking water. Major development decisions should reflect those long-term environmental priorities.

6. REGIONAL INFRASTRUCTURE

A development of this magnitude can place additional demands on roads, intersections, utilities, emergency services, water resources and other public infrastructure.

The question should not simply be whether the property can physically accommodate this facility.

Can Suffolk County's infrastructure and environment responsibly sustain the cumulative impacts of a project of this magnitude?

7. COMMUNITY CHARACTER & QUALITY OF LIFE

The effects of major industrial development do not stop at the borders of a single neighborhood.

Traffic moves through surrounding communities. Trucks use regional roads. Environmental impacts can extend beyond property boundaries. Our drinking-water resources are shared.

Land-use decisions of this magnitude can establish precedents that affect communities throughout Suffolk County.

OUR POSITION

We respectfully call upon the Town of Islip, Suffolk County, reviewing agencies and all officials with jurisdiction over this proposal to:

- **Reject the proposed Amazon mega warehouse known as Project Sunrise.**
- **Reject zoning changes or other land-use approvals necessary to facilitate a project of this magnitude.**
- **Reject public tax incentives or subsidies that would shift the financial burden of an extraordinarily large private development onto taxpayers.**
- **Fully evaluate the cumulative regional impacts on traffic, public safety, infrastructure, drinking water, groundwater recharge, air quality, woodlands, wildlife and surrounding communities.**
- **Protect Suffolk County's drinking-water aquifers and remaining open space.**
- **Prioritize the health, safety and quality of life of Suffolk County residents.**
- **Support responsible economic development that is appropriately located, environmentally sustainable and compatible with surrounding communities and regional infrastructure.**

THIS IS BIGGER THAN ONE NEIGHBORHOOD.

By signing this petition, we affirm our opposition to the proposed Project Sunrise Amazon mega warehouse and ask our government officials to protect **Suffolk County's residents, infrastructure, environment, drinking water and future.**

We support responsible economic development and job creation. But economic development must be responsible.

A project of this magnitude should not move forward when its potential consequences extend beyond the development site and could affect communities throughout Suffolk County and Long Island.

**PROTECT SUFFOLK COUNTY. PROTECT OUR WATER. PROTECT OUR COMMUNITIES.
PROTECT OUR FUTURE.**
